DETAILED ACTION

Examiner amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Mendonsa (Reg. No. 42879) on 09/20/2010.

The application has been amended as follows:

In The Claim:

1. (Currently Amended) A method comprising:

measuring cumulative mesh network viability, based upon at least one server calculated packet loss information ~~calculated~~, from packets transmitted from at least one of a plurality of nodes, wherein ~~the a~~ wireless network is an ad hoc wireless network and the packet loss information is calculated by:

$$P_{k+1} = P_k + (C - L - 1)$$

where P_k = total packet loss calculated in a previous period, P_{k+1} = total packet loss calculated in a current period, C = packet count in the current period, and L = packet count in the previous period.

9. (Currently Amended) A wireless network comprising:

a plurality of nodes configured to at least transmit packets in the wireless network;
at least one server operably configured to calculate packet loss information in the wireless network during packet transmission from at least one of the plurality of nodes such that overall mesh network viability of the wireless network is measured in the wireless network, wherein the wireless network is an ad hoc wireless network and the packet loss information is calculated by:

$$P_{k+1} = P_k + (C - L - 1)$$

where P_k = total packet loss calculated in a previous period, P_{k+1} = total packet loss calculated in a current period, C = packet count in the current period, and L = packet count in the previous period; and

a store for storing the packet loss information.

13. (Currently Amended) The wireless network of claim 9 wherein the at least one server discards the packets.

31. (Currently Amended) The method of claim 21 wherein mesh network viability is the cumulative packet loss in the ad hoc wireless network.

(End of Amendment)

Allowable Subject Matter

2. Claims 1, 3-13 and 31-32 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, none of the prior art of record teach or suggest the packet loss

information is calculated by:

$$P_{k+1} = P_k + (C - L - 1)$$

where P_k = total packet loss calculated in a previous period, P_{k+1} = total packet loss calculated in a current period, C = packet count in the current period, and L = packet count in the previous period.

Therefore, the Examiner allows these limitations in combination with other features recited in the claim. Claims 3-8 and 31-32 are also allowed because the claims are dependent directly or indirectly on claim 1.

Regarding claim 9, none of the prior art of record teach or suggest the packet loss information is calculated by:

$$P_{k+1} = P_k + (C - L - 1)$$

where P_k = total packet loss calculated in a previous period, P_{k+1} = total packet loss calculated in a current period, C = packet count in the current period, and L = packet count in the previous period

Therefore, the Examiner allows these limitations in combination with other features recited in the claim. Claims 10-13 are also allowed because the claims are dependent directly or indirectly on claim 9.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dai A Phuong whose telephone number is 571-272-7896. The examiner can normally be reached on Monday to Friday, 9:00 A.M. to 5:00 P.M..
